YOUR LIFE MAY DEPEND ON IT

VANCOUVER CIVIL DEFENCE
1572 West 4th Avenue - Vancouver, B. C.
Telephone: BAyview 1181 - 1957

THINGS TO REMEMBER

- Keep your gas-tank at least half filled.
- Keep your car radio or a battery radio in serviceable condition.
- Know your evacuation route from your home or your work.
- When you hear the steady siren blast, turn on your radio and listen to instructions.
- Take supplies.
- Stay calm and obey instructions.
- Co-operate with others.
- Organize a family plan.
- Get as far as possible beyond 20 miles if you are driving.
- If you have no car, walk to the nearest school playground or dock.

WHAT TO DO IN YOUR HOME BEFORE YOU LEAVE

1. Turn off water.
2. Turn off gas and electricity.
3. Turn off fuel supply (oil).
4. See that all windows and doors are locked, and curtains or blinds drawn across windows.
5. Put out all fires in furnaces or fireplaces.

WHY?

You live in a target area. A hydrogen bomb dropped in the area would cause complete destruction for a radius of 4 miles, major damage for a radius of 7 miles, moderate damage for 10 miles and minor damage for 20 miles. You must get beyond this 20 mile limit to be reasonably safe.

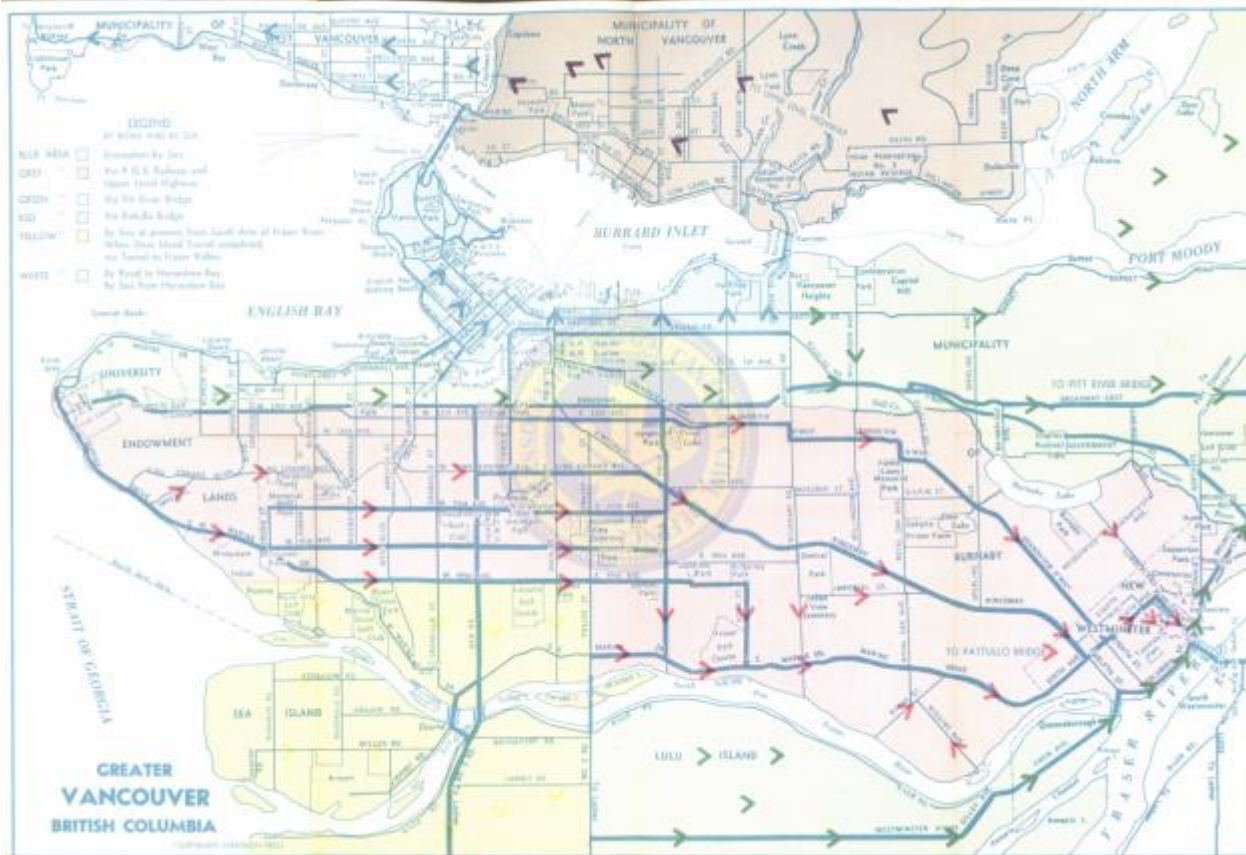

WHEN?

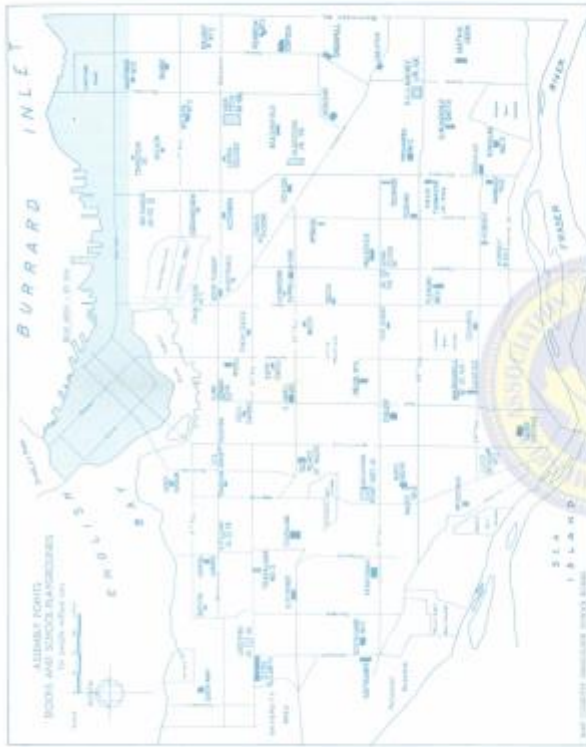

A STEADY SIREN BLAST lasting 3 minutes and repeated several times means EVACUATE your area. Turn on your radios and you will receive information and instructions from the civil defence director. If you are in the down-town area, loudspeakers will relay the broadcast. Follow instructions immediately.

IF THERE IS VERY LITTLE OR NO WARNING TIME A WAILING SIREN WILL BE USED AND IT MEANS TAKE COVER AT ONCE.

HOW?

By land or sea transportation according to where you live (see map). If by sea, walk to the nearest dock. If you have no car, walk to the nearest school playground where you will be picked up by civil defence transport. If you are driving a car, pick up a full load.

ACT IMMEDIATELY
 If there is sufficient warning time your effort will be made to re-enter lanes. The best 1-1/2 hours will be devoted to this after which all roads will be converted to one-way traffic. CROSS TRAFFIC WILL BE IMPOSSIBLE.

WHERE?
 Unless the civil defense director instructs otherwise, private cars will follow prearranged routes and must wait until they reach a reception station. If blocked by traffic after 20 minutes lay off the road whenever you can. People behind will still be in the danger area.

WHAT?
 The following should be taken if possible:
 1 Any food supply
 2 Maps to accessible emergency
 3 Blankets or sleeping bags, coats, sweaters, etc.
 4 First aid kits
 5 Candles and eating utensils
 6 Car keys
 7 Small tent, cloth
 8 Emergency radio
 9 Flashlight

SCHOOLS
 When the civil defense director orders schools will be closed. All children will go home to be evacuated with their parents.

RAILS
 If you have a car you are not driving a car you may be required to help in the evacuation of the car. If you are not driving a car you may be required to help in the evacuation of the car. If you are not driving a car you may be required to help in the evacuation of the car.

RAILWAYS
 Railways will be used for the evacuation of hospitals and institutions.

FALL-OUT
 You cannot see or smell a fall-out. Following a nuclear explosion, there may be radioactive particles which are carried by the wind. If you are in an area where a fall-out is expected, you should take cover immediately. If you are in an area where a fall-out is expected, you should take cover immediately. If you are in an area where a fall-out is expected, you should take cover immediately.

BEYOND THE 20-MILE LIMIT
 Underground shelter is the best protection against fall-out. If you are in an area where a fall-out is expected, you should take cover immediately. If you are in an area where a fall-out is expected, you should take cover immediately. If you are in an area where a fall-out is expected, you should take cover immediately.

WHEN?
 The best time to evacuate is during the first 20 minutes after the explosion. If you are in an area where a fall-out is expected, you should take cover immediately. If you are in an area where a fall-out is expected, you should take cover immediately. If you are in an area where a fall-out is expected, you should take cover immediately.

POSTAGE PAID
 U.S. No.
 PERMIT NO. 4032

TO THE HOUSEHOLDER
